STEVENS**
FOUNDATION

OUR MISSION IS TO RAISE AWARENESS AND INCREASE FUNDING FOR RESEARCH TO FIND A TREATMENT AND CURE FOR BLINDNESS, FOCUSING ON LEBER'S CONGENITAL AMAUROSIS (LCA).

PO BOX 2108 CHINO, CA 91708

In 2009, then 7 month old Gavin, the inspiration of the Gavin R Stevens Foundation (GRSF), was diagnosed with Leber's Congenital Amaurosis (LCA). LCA is an extremely rare retina disease that is present at birth, and causes blindness in both eyes. Unwilling to accept the fact that nothing could be done, GRSF was created; a 501c3 non-profit organization, ran by a group of dedicated volunteers.

Since its inception, GRSF has made remarkable strides! Gavin's particular LCA causing gene mutation has been discovered, which was undiscovered at the time he was diagnosed. With the help of our team of scientists here in the USA, and China, Gavin's gene discovery is making its mark in medical history. With this discovery, we can target Gavin's gene mutation, and bring about treatment for him, and others who live in darkness due to LCA.

To date, we have raised over \$250,000 for research. Our work is not nearly done. We need more funding for research to reach a clinical trial level, once approved by the FDA. It is through raising dollar by dollar, with no government backing, that we have reached the level we are at today.

We feel confident to be able to fund a major research project lab, to bring about a cure of LCA in the very near future. Medical science constantly reminds us to remain hopeful. There have been 22 children worldwide, affected by different types of LCA gene mutation have been treated in a clinical setting, and some vision restored. We know we can apply this same finding to Gavin's gene mutation, and bring about treatment for him, and others.

Thank you for considering our mission, and GRSF, to help bring these children out of the darkness they live in day to day. They deserve to visually navigate their life with vision. Gavin deserves to be able to see the faces of his loved ones, the beautiful sunset, or just the step in front of him. They all deserve to see the beauty in the world, and with your help, they will.

Gavin, age 3, affected by LCA and is completely blind.

"Never doubt that a small group of thoughtful, committed citizens can change the world. Indeed, it is the only thing that ever has." - Margaret Mead
